

# Completed Project

## Wallyford Primary School *East Lothian Council*

**The £19m Wallyford Primary is one of the largest primary schools in Scotland.**

The new school provides 28 classrooms, as well as a further four nursery classes offering up to 120 pre-school places.

The outside space includes all weather pitches, basketball hoops, landscaping and grassed areas. The school also includes resources for wider use by the community including a new library.

### **SOCIAL VALUE**

Through the Hub programme we are keen to ensure community benefits are delivered during construction to maximise local gain. Some key stats on deliverables can be seen over the page, and in addition to this, the Social Value Portal was used on the Wallyford Primary project and can evidence that it resulted in £5.8m social value added. This is made up of £5.6m being spent through a local supply chain (within 50 miles of site), alongside a number of positive outputs such as £251k generated from local employment, a further £5k in value of expert time given to SMEs and £2.7k in charitable donations.

*This is a really important occasion for Wallyford Primary School and the wider community.*

*It's been fascinating to watch the project develop from its initial stages through to successful handover. I'm especially pleased at the involvement that school staff and children have had throughout the construction process and the care that has been taken to take on board their views.*

*The finished school provides an inspiring learning environment for staff and children that will continue to grow with the area.*

**East Lothian Council  
Cabinet Spokesperson for  
Education, Councillor  
Shamin Akhtar**

*The new school offers great scope for shared learning and community use, offering benefits to the wider area too. Great consideration has been given to every aspect of the design to maximise the opportunities for children and it's great that they are all settling into their new space.*
